Education

Oregon State University

Masters of Science - Robotics

Corvallis, OR | April 2025 - June 2027

Oregon State University

Bachelor of Science, Double Major

Computer Science - *Robotic Intelligence track* (GPA: 3.5)

Mechanical Engineering

Corvallis, OR | March 2021 - June 2025

Work Experience

Human-Robot Interaction Researcher

Corvallis, OR | May 2024 - Present

OSU SHARE Lab (Robotics/AI)

- Engineered and optimized a real-time feedback system for a NAO robot, utilizing audio processing, computer vision, and LLMs to process audience reactions and enhance interactive performance.
- Developed a thermal imaging-based emotion detection system utilizing machine vision with OpenCV. Trained a machine learning model to classify user emotions using temperature data from facial regions.

Senior Sports Program Associate

Corvallis, OR | September 2024 - June 2025

OSU Dixon Sports Programs

- Built internal software to streamline team eligibility checks and league management, improving staff efficiency and operation workflows.
- Managed 7 Intramural leagues/Sport Clubs and 2 Intramural events, including marketing, training staff, preparing schedules, budgeting, coordinating disciplinary hearings, and evaluating the success of intramural activities.

Application Engineering Intern

Torrance, CA | June 2022 - September 2022

Sanyo Denki America

- Prototyped and troubleshoot mechanical systems and software for use in sales demonstrations
- Created embedded software for user and automated communication with multi-gantry systems given user/camera sensor inputs.

Projects

Robot Gesturing from AI Prompts

- Implemented natural language-driven robot gesture generation using a multimodal LLM, with feedback provided through simulated results and user provided responses.

Audience Feedback Understanding in Robot Comedy

- Developed a real-time audio and visual feedback system for a NAO robot to provide real-time crowdwork
- Captures, processes, and classifies audio and visual feedback using machine learning models
- Worked in a Linux environment, optimized model execution for low-latency performance on resource-constrained systems.

Leadership

Oregon State Men's Club Volleyball

Corvallis, OR | May 2022 - June 2025

President

- Prime representative of the club.
 - Increased membership from 44 → 113
 - Fundraising increase from \$1500/yr → \$20,000/yr
 - Leader of a team of officers, and organized 5 tournaments/year, plus multiple clinics

Skills

Coding: Python, C++, Linux/Ubuntu, ROS, SSH

Proficient in, CAD Software (Solidworks & Siemens NX), Prototyping, Robotics, Sensor Integration
