

Kevin Sabbe

sabbek360@gmail.com | Corvallis, OR

Education

Oregon State University

Master of Science - Robotics

Corvallis, OR | April 2025 - June 2027

Oregon State University

Bachelor of Science, Double Major, Cum Laude
Computer Science - *Robotic Intelligence track*
Mechanical Engineering

Corvallis, OR | March 2021 - June 2025

Work Experience

Human-Robot Interaction Researcher

OSU SHARE Lab (Robotics/AI)

Corvallis, OR | May 2024 - Present

- Engineered and optimized a real-time feedback system for a NAO robot, utilizing audio processing, computer vision, and LLMs to process audience reactions and enhance interactive performance.
- Developed a thermal imaging-based emotion detection system utilizing machine vision with OpenCV. Trained a machine learning model to classify user emotions using temperature data from facial regions.

Graduate Teaching Assistant

OSU College of Engineering

Corvallis, OR | September 2025 - Present

- Provide instructions and personalized guidance on coding fundamentals for mechanical engineers and ROS 2 for new robotics graduate students.

Senior Sports Program Associate / Software Engineer

OSU Dixon Sports Programs

Corvallis, OR | September 2024 - June 2025

- Built internal software to streamline team eligibility checks and league management, improving staff efficiency and operational workflows.

Application Engineering Intern

Sanyo Denki America

Torrance, CA | June 2022 - September 2022

- Created an embedded software controller for user and automated communication with multi-gantry systems, given user/camera sensor inputs. Prototyped mechanical systems for demonstrations.

Projects

Text-Vision to Robot Gesturing Model

- Implemented natural language-driven robot gesture generation, for any robot form factor, using a multimodal LLM with feedback provided through simulated results and user-provided feedback.

Audience Feedback Understanding in Robot Comedy

- Developed a real-time audio and visual feedback system for a NAO robot to provide real-time crowdwork
- Captures, processes, and classifies audio and visual feedback using machine learning models optimized for low-latency performance on resource-constrained systems.

Leadership

Oregon State Men's Club Volleyball

President

Corvallis, OR | May 2022 - June 2025

- Prime representative of the club.
 - Increased membership from 44 → 113
 - Fundraising increased from \$1500/yr → \$20,000/yr
 - Leader of a team of officers, and organized 5 tournaments/year, plus multiple clinics

Skills

Coding: Python, ReactJS, C++, Matlab, ROS/ROS2

Proficient in, CAD Software (Solidworks & Siemens NX), Prototyping, Sensor Integration
